

MAFILL®
glass filled

Ravago presents

MAFILL®

one of its pure industrial quality brands

Utilizing only post-industrial waste, Mafill® PP grades are recycled materials but with high-end characteristics.

The expertise of the scrap sorting team of Ravago assures that the selection of the industrial materials used as raw materials are of high quality, with the stability and the specifications that make the Mafill® PP grades very reliable products.

A perfect combination of price and quality, Mafill® PP grades are highly recommended for a wide variety of applications like automotive and industrial parts.

Mafill® PP compounds provide:

High end specifications

UV resistance

Long term thermal stability

Cost effective

Mafill[®] glass filled - product portfolio

High quality recycled Compounds

Mafill® PP compounds from just part of an extensive portfolio of high quality recycled plastics compounds from Ravago. Ravago has been manufacturing recycled compounds for over 50 years and it is this experience that allows converters and end users to have the confidence to specify our products. The portfolio consists of the following brands:

Ravaplen®	ECO PP	Sicoklar®	PC
Ravamid®	PA6, PA66	Sicostirolo®	PS
Mablex®	PC / ABS	Ravalene®	PE
Sicoflex®	ABS	Ravaflex®	Synthetic rubber

Mafill PP® recycled compounds

Mafill® recycled PP compounds offer the end user a broad range of solutions via a wide product portfolio that includes:

Unfilled black, colored and natural grades	Combined filling
Unfilled colored (terracota, green)	Elastomer modified
Unfilled natural	UV and heat stabilized
Talc or CaCO3 filled (5-70%) black/natural	MFI range from 1.5 to 40 g/10min
Glass fibre reinforced (5-50%) black	Tailor made compounds

The quality control of raw material feedstock used for Mafill® PP recycled compounds is a critical part of the manufacturing operation. Feedstock is fully tested and classified before the compounding operation. This allows the correct quality of feedstock to be allocated to the final product. Each Mafill® PP recycled compound lot that is produced is shipped with a certificate of analysis.

High quality recycled PP compounds Mafill® is recommended mainly for demanding and nonvisual applications including:

AUTOMOTIVE	Cowl vent grill / water deflector	NON AUTOMOTIVE	Garden furniture
	Wheel arch liner		Artificial wood profiles
	Filter housing		White goods parts
	Under body parts		Parts of appliances
	Battery trays		
	Headlight housing		
	Bumper mount		
	Inlet manifold		
	Toolbox		

The Ravago Group is a leading international supplier of plastics and rubber to customers and end-users in almost every corner of the world. In 1961, long before plastics recycling became fashionable, Ravago pioneered the reprocessing of industrial plastic waste and its conversion into a new raw material source.

Ravago Group is active in the compounding, distribution, recycling and resale of plastics and rubber. Today, with more than 55 years of market presence, Ravago ranks as one of Europe's oldest and most prominent plastic enterprises.

Whilst high quality recycled polymers have been finding their way into non visual automotive applications for some time, visual parts have been always produced from prime polymers.
