**To whom it may concern**

Please note that in none of the production processes of the aforementioned brands / grades have been intentionally added the substances defined in the regulatory transposition (EU) 2017/84 of the European Commission relating to mineral oil hydrocarbons (MOSH and MOAH) in the plastic raw material produced by Ravago.

However, please note that the concentrations of substances, both in the finished products and in the raw materials, have not been checked internally by specific analysis and we do not ask our suppliers to confirm the absence of the substances mentioned as impurities in their products, although the documents that they can accompany them, demonstrate their regulatory compatibility.

As the European standard refers to manufactures in contact with food products, this declaration does not exempt the processor from carrying out their own investigations and tests, nor does it imply any guarantee for certain properties or the suitability of the product to any standard.

This information applies to the material as it leaves its production facilities and does not cover any additives, pigments, etc... subsequently included or introduced by the processor.
